CBS ArcSafe® Introduces RSA-187A Remote Switch Actuator for General Electric E Line Low-Voltage Molded Case Circuit Breakers

Denton, Texas, November 3, 2014 – [CBS ArcSafe®](#), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its remote switch actuator for General Electric “E Line” (150 A frame size) low-voltage molded case circuit breakers. The new CBS ArcSafe RSA-187A actuators allow personnel to operate the molded case circuit breakers from a safe distance stationed outside the arc-flash perimeter without having to make any modifications to the breaker.

When accompanied by a CBS ArcSafe remote switch operator (RSO) control unit, the RSA-187A reduces the need for arc-flash suits and eliminates all hazardous manual contact with gear during operation by providing open and close operation from up to 300 feet away. The actuator is lightweight, portable, easy to install and set up, and provides technicians with a simple solution for hard-to-access breaker locations. The RSA-187A requires no modifications to be installed and operated and can be moved easily and quickly from one breaker to another.

All CBS ArcSafe products are manufactured in the U.S. at our manufacturing facility in Denton, Texas. For more information, visit CBSArcSafe.com or call 877-4-SAFETY.

About CBS ArcSafe®

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation. All our equipment is manufactured in the U.S. at our Denton, Texas, manufacturing facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers.
