

CBS ArcSafe® Announces RSA-161A Remote Switch Actuator for Schneider Class 9421 Type L Circuit Breakers

Denton, Texas, September 17, 2014 – [CBS ArcSafe®](#), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, is pleased to announce the launch of its new remote switch actuator for Schneider Class 9421 Type L circuit breakers.

The new CBS ArcSafe RSA-161A actuator, which was recently named Product of the Year by Occupational Health & Safety magazine, are designed for all 3-in. handle versions of the Type L circuit breaker mechanisms, which operate circuit breakers or interrupters of 75-250A at up to 600V. This actuator allows technicians to safely operate the breakers while stationed outside of the arc-flash hazard boundary without any modification to the breaker.

When accompanied by a CBS ArcSafe remote switch operator (RSO) control unit, the RSA-161A reduces the need for arc-flash suits and eliminates all hazardous manual contact with gear during operation by providing operation from up to 300 feet away. The actuator is lightweight, portable, and easy to install and set up, providing technicians with a simple solution for hard-to-access breaker locations. The RSA-161A requires no modifications to be installed and operated, and can be moved from one breaker to another easily and quickly.

All CBS ArcSafe products are manufactured in the U.S. at our manufacturing facility in Denton, Texas. For more information, visit [CBSArcSafe.com](#) or call 877-4-SAFETY.

About CBS ArcSafe®

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation. All our equipment is manufactured in the U.S. at our Denton, Texas, manufacturing facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers.
