## CBS ArcSafe® Introduces RRS-3 HK Remote Racking Solution for HK-Style Circuit Breakers

Denton, Texas, July 28, 2015 – [CBS ArcSafe®](#), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its RRS-3 HK remote racking solution for all HK-style circuit breakers manufactured by ABB, BBC, or ITE with current ratings from 1,200–3,000A. The new CBS ArcSafe RRS-3 HK allows technicians to remotely rack in or out of the HK-style medium-voltage power circuit breaker from a safe distance while remaining stationed outside of the arc-flash boundary.

Installation and operation of the CBS ArcSafe RRS-3 HK is quick, simple, and does not require any modifications to the existing equipment. HK-style circuit breakers may typically be found in generation, chiller/HVAC, petrochemical, water/waste treatment, and pulp/paper applications. By automating the racking procedure, the CBS ArcSafe RRS-3 HK reduces operator fatigue and increases operator safety.

All CBS ArcSafe products are manufactured in the U.S. at our manufacturing facility in Denton, Texas. For more information, visit [CBSArcSafe.com](http://CBSArcSafe.com) or call 877-4-SAFETY.

### About CBS ArcSafe®

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation. All our equipment is manufactured in the U.S. at our Denton, Texas, manufacturing facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers. Learn more at [CBSArcSafe.com](http://CBSArcSafe.com), or call toll-free at 877-4-SAFETY.
