CBS ArcSafe® Introduces RSA-154F Remote Switch Actuator for Siemens Vacu-Break Fusible Panel Unit Switches

Denton, Texas, July 7, 2015 – CBS ArcSafe®, a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its remote switch actuator for Siemens Vacu-Break fusible unit switches. The new CBS ArcSafe® RSA-154F remote switch actuator allows technicians to remotely close or open the switches from a safe distance while remaining stationed outside the arc-flash boundary.

Installation and operation does not require any modifications to the existing electrical equipment. The RSA-154F is compatible with all type VF357, VB357, VF358, and VB358 Siemens Vacu-Break panel switches with a 25" height and ratings from 800-1200A. Typical applications of these switches include manufacturing plants, mass-production industries, and commercial, institutional, and other large buildings served by network systems or transformers of higher capacities. The RSA-154F is a cost-

effective solution for keeping operators safe when compared to other arc-flash mitigation alternatives.

All CBS ArcSafe products are manufactured in the U.S. at our manufacturing facility in Denton, Texas. For more information, visit <u>CBSArcSafe.com</u> or call 877-4-SAFETY.

About CBS ArcSafe®

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation. All our equipment is manufactured in the U.S. at our Denton, Texas, manufacturing facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers. Learn more at <u>CBSArcSafe.com</u>, or call toll-free at 877-4-SAFETY.
